PROFESSIONAL SUMMARY

I am a Computer Science student; I am developing a growing interest in using technology to solve real-life problems. Through academic tasks and practical projects, I have gained experience in applying theory to real-life business problems. My education philosophy highlights practical experience, group learning, and technical and strategic thinking development. I am currently seeking an internship to further my professional growth.

PROJECTS

Popflix – Full Stack Movie Web App

<https://popflix-ff5ab.web.app/>

Developed a full stack movie platform inspired by streaming apps.

- Frontend: React.js with responsive UI, movie categories, details page, search, filtering.
- Backend: Laravel API for authentication (login/register), user profiles, and favorites system.
- Integrated with TMDB API to fetch real-time movie data.
- Tech Stack: React.js, Bootstrap, Laravel (PHP), TMDB API.

Portfolio Website

<https://zeyadhatem.vercel.app/>

Personal portfolio showcasing projects, skills, and contact form.

- Includes an admin dashboard (Laravel) to manage content dynamically.
- Designed with responsive UI and smooth animations.
- Tech Stack: React.js (Frontend), Laravel (Backend).
